INTERNATIONAL SEARCH REPORT

a. classification of subject matter IPC 7 G06F19/00					
According to	International Patent Classification (IPC) or to both national classification	tion and IPC			
B. FIELDS SEARCHED Minimum documentation searched (classification system followed by classification symbols)					
IPC 7	G06F	n symbols)			
		and the standard in the Standard			
Documentat	on searched other than minimum documentation to the extent that su	ich documents are included in the lielos se	archeo		
Electronic da	ata base consulted during the international search (name of data bas	e and, where practical, search terms used			
EPO-In	ternal, INSPEC, WPI Data				
C. DOCUM	ENTS CONSIDERED TO BE RELEVANT				
Category °	Citation of document, with indication, where appropriate, of the rele	evant passages	Relevant to claim No.		
X	KÜSTER B, MORTENSEN P, ANDERSEN J M: "Mass Spectrometry allows dir identification of proteins in lar genomes" PROTEOMICS, vol. 1, 2001, pages 641-650, XP00 page 641 - page 642 figure 2.b page 647, right-hand column	ect ge	1-25		
Further documents are listed in the continuation of box C. Patent family members are listed in annex.					
*Special categories of cited documents: *A* document defining the general state of the art which is not considered to be of particular relevance *E* earlier document but published on or after the international filling date *C* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified) *O* document referring to an oral disclosure, use, exhibition or other means *P* document published after the international filling date but later than the priority date claimed *T* tater document published after the international filling date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined with one or more other such document is combination being obvious to a person skilled in the art. *X* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined with one or more other such document is combination being obvious to a person skilled in the art. *X* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such document is combined with one or more other such document is combined with one or more other such document is combination being obvious to a person skilled in the art. *X* document member of the same patent family Date of mailing of the international search report		the application but sory underlying the stained invention be considered to cument is taken alone chaimed invention ventive step when the ore other such docuust to a person skilled family
